 TITLE : COSMOS FUNERAL SYSTEM

ABSTRACT : PURPOSE: To obtain the cosmos funeral system for transporting a container full of the dreams before death of a person who dreams cosmos flight to the cosmos space.

CONSTITUTION: The objective cosmos funeral system consists of a stage for sending a container 1 to a member who wishes cosmos funeral, stage for recovering the container 1 in which the articles left behind, skeletal remainder, message, etc., which are supplied from the member, bereaved family, etc., are accommodated, stage for storing the recovered container 1 up to the transfer for launching, stage for launching the container 1 to the cosmos space, stage for constructing a tombstone or a monument 3 after launching, and a stage for informing the member and the bereaved family about the completion of launching. Accordingly, the container full of the dream before death of a person who dreams the cosmos flight can be transported into the cosmos space in the planned and sure manner. Further, the result of the launching is informed to the member and bereaved family, and since the tombstone or monument is constructed, the bereaved family can hold a memorial service for long years.
